Replacement LED Light Bar

Madjax recommends professional installation. If you choose to not have this product installed by a professional, we highly recommend that you exercise caution, care, and patience when installing this product as it involves drilling holes into your cart's body.

There are optional daytime runlights in the LED headlights. For instructions on how to utilize this feature skip to STEP 4.

Remove two factory bolts from light bar brackets and retain. Unplug 6 pin harness and horn wires if needed to free light bar from cart.

A) Remove and retain three screws from back side of light bar as shown.

B) Attach new LED bar using three screws.

Reattach light bar and bumper to cart using bolts from STEP 1 and tighten. Plug in 6 pin harness and horn wires if needed.

NOTE: If you wish to run daytime lights a MJ1230 Convertor will be needed to operate them through your keyswitch. If you do not, the daytime run lights will still come on with your headlights.

Unplug bullet connector's on light bar side of 6 pin connector as shown.

Using a 16-18 AWG wire with a female bullet connector, attach to the red accessory wire from your MJ1230 Convertor.

When you turn on the key switch the daytime run lights will now come on. They will stay on when you turn on the headlights and will only turn off when the keyswitch is off.

INSTALLATION COMPLETE
